# ABOUT NASSCOM AND FUTURESKILLS

## NASSCOM (National Association of Software and Service Companies)

**NASSCOM** is India's leading industry association for the IT, IT-enabled services, and emerging technology sectors, committed to driving innovation, digital excellence, and global competitiveness. It plays a pivotal role in shaping industry standards, influencing policy, and fostering collaboration between government, academia, and enterprises. Through its initiatives, NASSCOM empowers India's tech ecosystem with future-ready talent, research insights, and programs that accelerate digital transformation across industries.

**FutureSkills Prime** is a digital skilling initiative by NASSCOM, developed in partnership with the Government of India, aimed at building a future-ready workforce. It offers industry-vetted courses, certifications, and learning pathways in emerging technologies like AI, Data Science, Cloud, and Cybersecurity to help professionals upskill and stay competitive.

*About*

# THE IOT ACADEMY

**The IoT Academy,** established in **2017** is a fast emerging company imparting quality programs for skills training, internship and guidance in cutting edge technologies like **Data Science, Machine Learning, Artificial Intelligence, Internet of Things, Embedded Systems & many more** and focused on helping people develop the skills they need to thrive in the rapidly growing digital economy.

The IoT Academy has collaborated with various premier institutes e.g. **E&ICT Academy, IIT-Roorkee, IIT-Guwahati and IIT-Kanpur** for **Advance Certification courses** to provide outcome-centric solutions to help them achieve their professional goals.

Forbes INDIA

We are proud to share that

# The IoT Academy

has been featured in **Forbes India** under

- ✦ "Visionary Companies Building India's Future"
- ✦ Ranked #2 Nationwide

This recognition reflects our unwavering mission to empower learners with future-ready skills!

- ✦ From classrooms to careers...
- ✦ From learners to innovators...
- ✦ From ambition to achievement...

A heartfelt thank you to our students, mentors, industry partners, and community for trusting us and growing with us.

**The journey has just begun.**
**Bigger milestones ahead.**

# ONE-DAY IMMERSION PROGRAM
# DEDICATED AI LAB EXPERIENCE

## Explore Advanced AI Devices & Vision Systems

Get hands-on with smart helmet detection setups, high-resolution computer vision cameras, real-time detection systems, and multimodal AI stations used in modern industries.

## Learn Real Computer Vision Workflows

Experience end-to-end AI tasks such as live helmet detection, object/face recognition, video analytics, and scene interpretation under expert guidance.

## Build Your Own AI Mini Project

Create a functional AI prototype in one day—like a helmet detection model, face-ID access system, AI surveillance tool, or vision-enabled AI assistant—to add to your portfolio.

## Get Expert Review & Official Certification

Receive mentor feedback, participate in a time-bound AI challenge, present your model, and earn a One-Day AI Immersion Certificate showcasing practical AI skills.

# FACULTY DEVELOPMENT PROGRAMS (FDPS)

- Conducted multiple intensive workshops for college faculty on AI-driven signal processing techniques.
- Delivered hands-on training using Edge Impulse, Python, and Hugging Face to build and deploy real-world AI models.
- Empowered educators to seamlessly integrate advanced AI/ML algorithms into their teaching and research.

# INDUSTRIAL VISITS FOR STUDENTS

- Organized immersive visits to leading IoT manufacturing facilities and smart-factory labs.
- Enabled learners to observe real-world deployment of embedded systems, edge computing, and sensor networks.
- Fostered practical insights through direct interaction with industry engineers and live project demonstrations.

# *Why Learn*
# DATA ANALYTICS & BUSINESS ANALYTICS?

- **High Demand:** Data analytics roles such as Data Analyst, Business Analyst, and Data Visualization Specialist are projected to grow by 23–35% through 2030, making it one of the fastest-growing career fields.
- **Wide Career Opportunities:** Skills in analytics and visualization open doors across technology, finance, healthcare, e-commerce, retail, consulting, manufacturing, and public sector industries.
- **Essential for Every Business:** Organizations rely on analytics to monitor performance, understand customer behavior, reduce risks, improve processes, and support strategic decision-making.
- **Strong Problem-Solving Focus:** Analytics equips learners to interpret data, identify patterns, solve business challenges, and make meaningful recommendations that drive business growth.
- **Data Visualization Advantage:** Learn to transform complex data into clear dashboards and visual stories, enabling faster, more effective decision-making across teams and leadership.

# PROGRAM HIGHLIGHTS

# PLACEMENTS & HIRING

# PROGRAM CURRICULUM

## Data Analytics, Data Visualisation & Business Analytics

# Program Curriculum

MODULE 1

## Excel for Data Analysis

- Excel basics: formulas, functions (VLOOKUP, INDEX/MATCH, IF, SUMIF)
- Pivot tables, charts, conditional formatting
- Data cleaning & preprocessing in Excel
- Mini Project: Analyze sales dataset with pivot tables & charts

MODULE 2

## Python Fundamentals

- Python environment setup (Anaconda/Jupyter/VS Code)
- Variables, operators, data types
- Control flow (loops, conditionals)
- Functions & modules

MODULE 3

## Python Data Structures & Libraries

- Lists, tuples, sets, dictionaries
- File handling (CSV, Excel, JSON)
- NumPy arrays and operations
- Mini Project: Basic Python ETL script

## Program Curriculum

MODULE 4

### Pandas for Data Handling

- Series & DataFrames
- Data cleaning: missing values, duplicates, data types
- Merging, grouping, aggregations
- Mini Project: Customer dataset cleaning & analysis

MODULE 5

### Descriptive Statistics & Probability

- Mean, median, mode, variance, standard deviation
- Skewness, kurtosis
- Probability rules & distributions (Normal, Binomial, Poisson)
- Mini Project: Explore sales dataset distribution

MODULE 6

### Inferential Statistics

- Sampling methods & Central Limit Theorem
- Confidence intervals
- Hypothesis testing (t-test, chi-square, ANOVA)
- Mini Project: A/B testing for marketing campaign

## Program Curriculum

MODULE 7

### SQL Fundamentals

- ntroduction to relational databases
- SELECT, WHERE, ORDER BY
- Aggregation: SUM, AVG, COUNT, GROUP BY, HAVING
- Mini Project: SQL queries on HR dataset

MODULE 8

### Advanced SQL

- Joins (INNER, LEFT, RIGHT, FULL)
- Subqueries & CTEs
- Window functions (ROW_NUMBER, RANK, LAG/LEAD)
- Mini Project: Customer purchase analysis with SQL

MODULE 9

### Data Visualization with Python

- Matplotlib basics (line, bar, scatter, histograms)
- Seaborn for statistical plots (boxplot, violin, heatmap)
- Visualization best practices

## Program Curriculum

MODULE 10

### Advanced Visualization & Dashboards

- Seaborn advanced plots (pairplot, jointplot)
- Time series visualization
- Excel dashboards (interactive charts, slicers)
- Mini Project: Sales dashboard in Excel

MODULE 11

### Business Analytics Concepts

- Difference: Data Analytics vs Business Analytics
- Types: descriptive, diagnostic, predictive, prescriptive analytics
- Identifying KPIs & business metrics
- Mini Project: Define business KPIs for a retail dataset

MODULE 12

### Business Case Study

- Retail sales optimization
- Customer segmentation basics (RFM analysis)
- Case Study Project: Analyze retail dataset, present insights

## Program Curriculum

MODULE 13

### End-to-End Data Workflow

- Collect → Clean → Analyze → Visualize → Business Insights
- Integrating Python + SQL + Excel in projects
- Mini Project: Marketing data analysis pipeline

MODULE 14

### Domain Mini-Projects

- Finance: Risk analysis
- Retail: Product performance analysis
- HR: Attrition analysis
- Students pick 1 domain project

MODULE 15

### Capstone Project (Development Phase)

- Problem definition
- Data exploration & cleaning
- Applying statistics, SQL, visualization
- Draft insights & business recommendations

MODULE 16

### Capstone Presentation & Portfolio

- Final capstone project presentation
- Peer/instructor feedback
- Portfolio preparation (GitHub, LinkedIn, Resume)
- Mock interview with business case discussion

# ADVANCED TOOLS YOU WILL LEARN

# SKILLS YOU WILL MASTER

| | | |
|---|---|---|
| Data Analysis | Data Visualization | Business Analytics |
| Data Manipulation | Exploratory Data Analysis (EDA) | SQL Queries |
| Advanced Excel | Data Summarization | Trends Analysis |

# Live Industry-Based Projects

Industry projects are an important part of the Data Analytics, Data Visualisation & Business Analytics. These projects let you work on real problems from real companies. You get hands-on experience in Data Analytics, Data Visualisation & Business Analytics. This helps you learn practical skills and solve tough problems in different industries.

### Customer Churn Risk Analysis

**Description:** Analyzed customer demographics, usage patterns, and complaint history to identify high-churn segments and key behavioral drivers.

**Tools and Technologies:** Excel, SQL, Python.
**Outcomes:** Ranked churn-risk list and targeted retention insights.

### Customer Churn Prediction (ML)

**Description:** Built a machine learning model using usage, complaint, and plan data to predict churn probability and uncover major churn drivers.

**Tools and Technologies:** Python (Pandas, Scikit-learn), SQL.
**Outcomes:** Interactive churn dashboard with risk scores and driver analysis.

# Live Industry-Based Projects

### Healthcare Appointment No-Show Analysis

**Description:** Explored appointment records to determine factors causing patient no-shows and quantified their impact on operations.

**Tools:** Python, Pandas, Visualization, Logistic Regression.
**Outcomes:** No-show risk scoring model with policies to reduce missed visits.

### E-commerce Sales Performance & Cohort Analysis

**Description:** Evaluated order, customer, and channel data to detect sales trends, cohort behavior, and seasonal buying patterns.

**Tools and Technologies:** SQL, Python, Excel, Power BI/Tableau.
**Outcomes:** Monthly sales insights and cohort-based growth recommendations.

### Retail Market Basket & Cross-Sell Analysis

**Description:** Applied association rule mining on transaction data to identify frequently purchased product pairs and cross-sell opportunities.

**Tools:** Python (mlxtend), SQL, BI tools.
**Outcomes:** Data-driven cross-sell suggestions and optimized store layout ideas.

# Live Industry-Based Projects

### Time-Series Revenue Forecasting – Subscription App

**Description:** Developed a dynamic dashboard to visualize sales by region, product, and channel with filters, KPIs, and drill-down capabilities.

**Tools:** Power BI/Tableau, SQL/Excel.

**Outcomes:** One-page executive dashboard for rapid performance tracking.

### Urban Traffic Congestion Visual Storyboard

**Description:** Mapped traffic data to highlight congestion hotspots, peak-hour patterns, and impacts of events or weather conditions.

**Tools:** Python (Plotly), GIS/ Tableau.

**Outcomes:** Visual storytelling report supporting smart-city traffic decisions.

### Interactive Executive Sales Dashboard

**Description:** Developed a dynamic dashboard to visualize sales by region, product, and channel with filters, KPIs, and drill-down capabilities.

**Tools:** Power BI/Tableau, SQL/Excel.

**Outcomes:** One-page executive dashboard for rapid performance tracking.

# Live Industry-Based Projects

### Dynamic Pricing & Discount Optimization

**Description:** Analyzed price, discount, and sales history to recommend optimal discount strategies that maximize revenue and profit.

**Tools:** Excel, Python/R, SQL.

**Outcomes:** Pricing optimization playbook and simulation sheet for managers.

### End-to-End Marketing Funnel Analytics – SaaS

**Description:** Tracked campaign leads from acquisition to signup, trial, and paid conversion to measure channel effectiveness and ROI.

**Tools:** SQL, Python, GA/Looker Studio, Power BI.

**Outcomes:** Funnel performance report with channel-wise ROI and action plan.

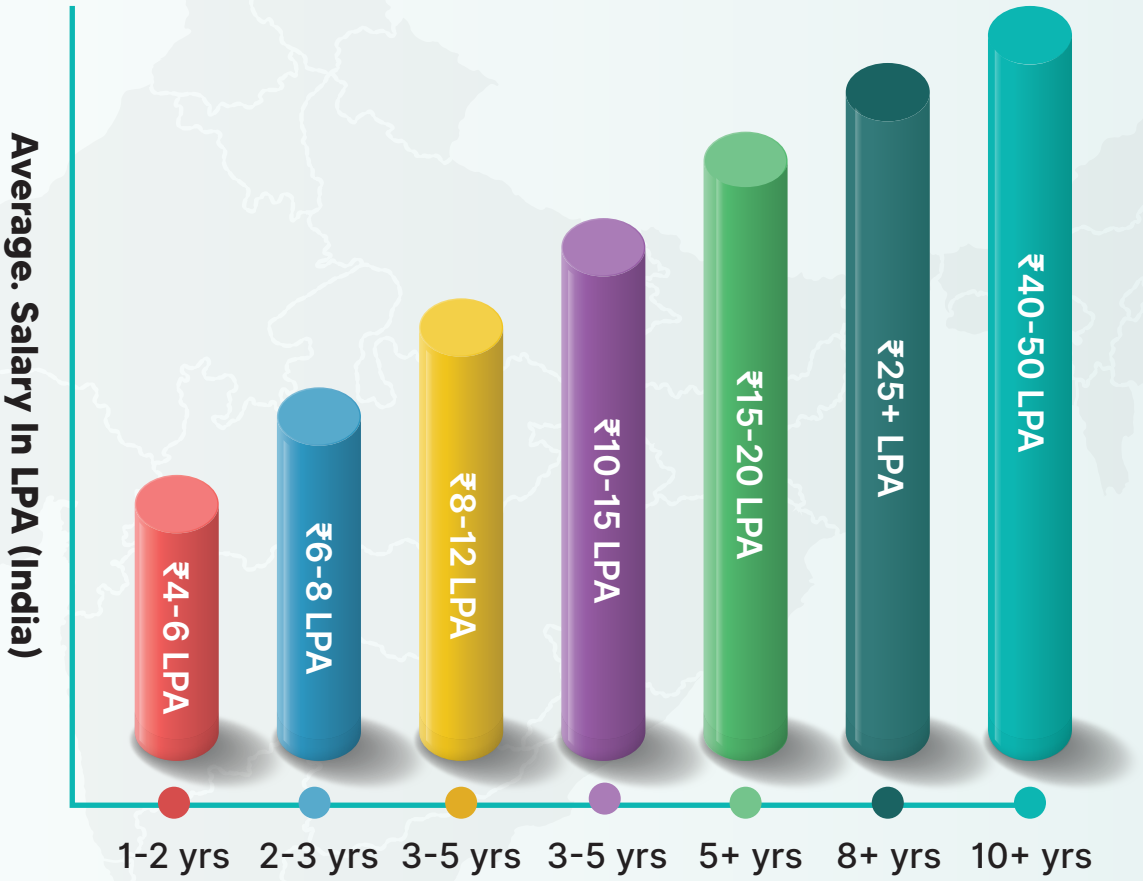

# WHO SHOULD JOIN THIS PROGRAM?

- Aspiring Data Analysts who want to build strong analytical, reporting, and visualization skills for entry-level roles.
- Business Professionals & Managers aiming to make data-driven decisions and leverage analytics for better business outcomes.
- Students & Fresh Graduates from any background looking to start a career in data analytics or business analytics.
- Working Professionals seeking career growth or a transition into analytics-driven roles across industries.
- Entrepreneurs & Startup Founders who want to use data insights to optimize operations, understand customers, and scale their businesses.
- Marketing, Finance, HR, and Operations Professionals who use data in daily decision-making and want to enhance their analytical capabilities.
- IT & Software Professionals planning to upgrade their skill set with analytics and visualization tools like Excel, SQL, Power BI, and Tableau.
- Anyone Interested in Data-Driven Careers and looking to learn how to interpret data, create dashboards, and communicate insights effectively.

# CAREER ROLES & SALARIES

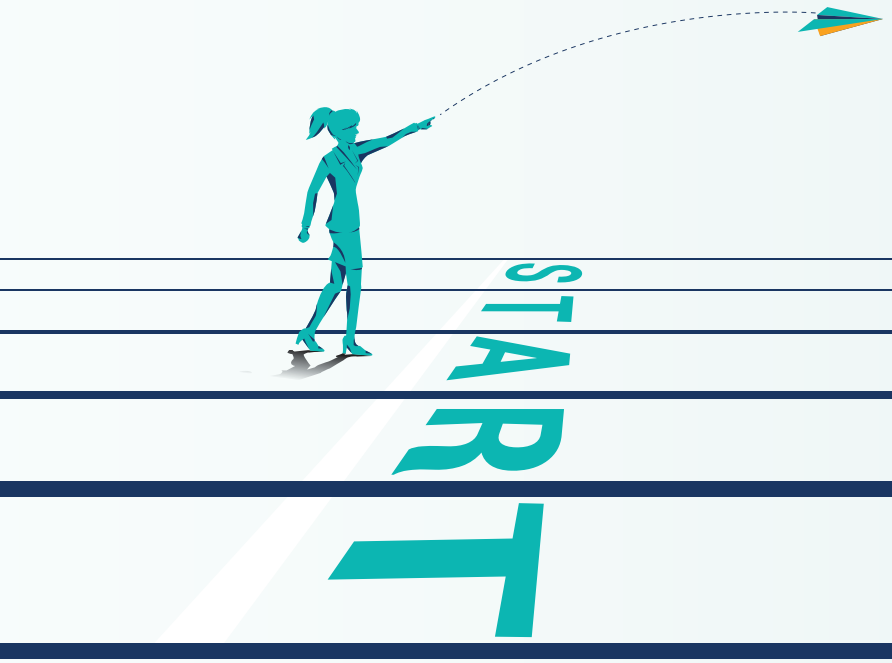

- Data Analyst
- Business Intelligence Analyst
- Senior Data Analyst
- Data Visualization Specialist
- Lead Data Analyst
- Data Science Manager
- Chief Data Officer

**Career Growth Path:**

Analyst → Senior Analyst → Lead → Manager → Director → CDO

# CAREER TRAJECTORY

| Experience Level | Experience | Average Salary (India) |
|---|---|---|
| Analyst (0–2 yr) | Entry Level | ₹4–6 LPA |
| Senior Analyst (2–4 yr) | Mid Level | ₹8–12 LPA |
| Lead Analyst (5–7 yr) | Senior Level | ₹15–20 LPA |
| Manager (8+) | Leadership | ₹25+ LPA |
| CDO (12+ yr) | Executive | ₹40–50 LPA |

## START CAREER WITH DATA ANALYTICS COURSE

# PLACEMENT SUPPORT

WE

**Alumni Referral Network**
Leverage our 6,200+ alumni working in top companies like TCS, Wipro, Accenture, and startups to get trusted referrals and unlock hidden job opportunities.

**Resume, LinkedIn & Portfolio Building**
Get expert guidance to create a powerful resume, optimize LinkedIn, and build an analytics portfolio that highlights your projects and skills to employers.

**Company-wise Interview Questions**
Practice with real data analytics interview questions from leading companies to boost confidence and improve your selection chances with technical and behavioral prep.

WANT YOU

# CAREER SUPPORT & GUIDANCE

**Discover Strengths & Interests**

Every learner has unique analytical abilities and problem-solving skills, but many are unsure how to apply them in data roles. Through assessments, project work, and mentoring sessions, we help learners discover their analytical strengths and where their interests lie in the data ecosystem.

**Explore Career Paths**

The analytics field offers diverse opportunities from business intelligence to data science. We provide detailed insights into various analytics roles, industry demands, and career progression paths, helping learners choose between business analytics, technical analysis, or data science tracks.

**Prepare for Technical Interviews**

Analytics interviews test both technical skills and problem-solving approach. Our structured preparation includes SQL coding practice, statistics questions, case study analysis, and Python programming challenges with personalized feedback to build confidence.

**Build Professional Portfolios**

Employers want to see real analytical work, not just certificates. We guide learners in building comprehensive portfolios with live projects, data visualizations, and case studies that demonstrate their ability to extract insights from complex datasets.

## How to Enroll & Next Steps

# ENROLLMENT PROCESS

**Step 1: Free Consultation**

- Book a free career counseling session
- Understand your analytics career goals and program fit

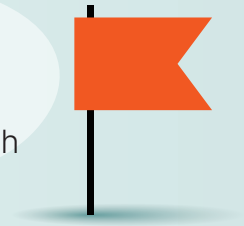

**Step 2: Trial Class**

- Attend one free Python/Statistics demo class
- Experience our teaching methodology and faculty interaction

**Step 3: Enrollment**

- Choose your batch timing and payment plan
- Complete admission formalities with document verification

**Step 4: Begin Learning**

- Start your data transformation journey
- Access lifetime support system and alumni network

**Next Batch Details:**
Batch Start Date: Every Monday

**Class Timings:**
Weekday Batch: **7:00 PM - 9:00 PM**
Weekend Batch: **10:00 AM - 1:00 PM**

**Mode:**
Live Online + Offline (Noida Center)

**Batch Size:**
Limited to 12 students

# PROGRAM FEE

**₹31,999 (Including GST)**

## Scholarship Available Upto 30%

(Scholarship is granted based on the candidate's Work Experience, Statement of Purpose,and Academic Background.)

## *Payment Options*

### 01 Full Fee Payment

1. Total Fee Payment: ₹31,999 (Including GST)
2. Admission Fees (payable on enrolment): ₹1,000

### 02 Installment Plan

1. Total Fee Payment: ₹31,999 (Including GST)
2. Admission Fees (payable on enrolment): ₹1,000
3. No. of Installments: 3 & 4 Months

*Note:*

- *Full fee will be divided into 3 or 4 monthly installments after deducting the scholarship awarded*
- *Contact your counselor for more details*

### 03 Loan & EMI Option

1. Total Fee Payment: ₹31,999 (Including GST)
2. Admission Fees (payable on enrolment): ₹1,000
3. Loan Amount: ₹30,999
4. No-Cost EMI Available: 3 Months & 4 Months

*Note:*

- *Full fee will be divided into 3 or 4 monthly EMIs after deducting the scholarship awarded*
- *Choose from our financing partners for interest-free EMI options*
- *Contact your counselor for more details*

# Data Analytics, Data Visualisation & Business Analytics Certification

**Why These Certifications Matter?**

- Industry-Recognized Credential endorsed by NASSCOM's FutureSkills Prime platform.
- Validates job-ready skills aligned with India's National Skills Framework (NSQF).
- Enhances employability with government-backed digital skills certification.
- Mapped to industry standards set by top tech companies and IT bodies.
- Boosts professional credibility with a nationally accepted qualification.
- Certifies mastery of emerging technologies demanded by leading employers.
- Supports career growth with proof of competency in specialized domains.
- Eligible for government incentives under the FutureSkills Prime program (where applicable).
- Adds weight to resumes & LinkedIn profiles for stronger job visibility.
- Recognized across IT, analytics, and AI-driven industries for recruitment and upskilling.

# The IoT ACademy VS OTHERS

| Factors | The IoT Academy | Other Institutes |
|---|---|---|
| **Founder Background** | IIT Alumni | Varied |
| **Batch Size** | 10-15 students | 50-100 students |
| **Fee Structure** | ₹29,999 (with EMI) | ₹70,000-₹1,00,000 |
| **Tools Covered** | Comprehensive & Latest | Limited |
| **1:1 Mentorship** | Daily sessions | Group sessions only |
| **Placement Rate** | 95% success rate | 60-70% average |
| **Industry Partnerships** | IIT + 400+ companies | Limited |
| **Live Projects** | Real industry datasets | Simulated projects |

# *Why Students*
# CHOOSE US OVER COMPETITORS

### Rohan Mehta

As a final-year student, I was confused about my career. This course from The IoT Academy gave me clear direction. The Data Analytics with Generative AI and Agentic AI lessons were easy to understand. The practical projects helped me improve my resume and do better in placements. I finally understood how analytics works in real companies. This course truly prepared me for the job market.

### Priya Nair

I have been working in operations for five years, and I wanted to upgrade my skills. The IoT Academy's course on Data Analytics with Generative AI and Agentic AI was perfect for me. The lessons are simple, practical, and based on real company needs. The case studies helped me use new techniques at work immediately. This course is not just theory — it is really useful and job-focused.

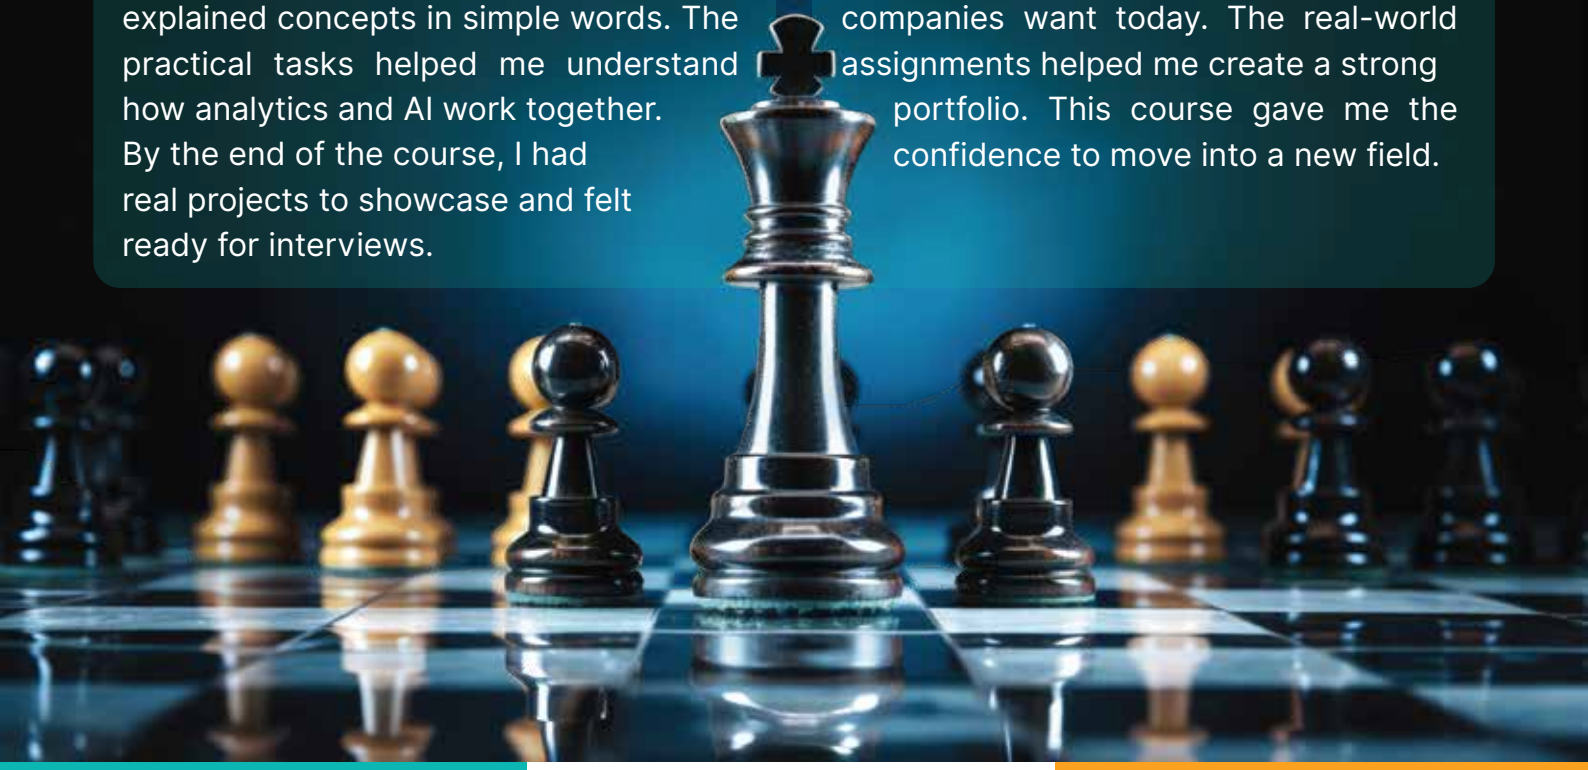

### Sneha Kulkarni

As a fresher, I felt I did not have the skills recruiters look for. But The IoT Academy's Data Analytics with Generative AI and Agentic AI course changed everything. The mentors explained concepts in simple words. The practical tasks helped me understand how analytics and AI work together. By the end of the course, I had real projects to showcase and felt ready for interviews.

### Amit Sinha

I wanted to switch careers, but I was nervous. After joining this course from The IoT Academy, things became easier. The training starts from the basics and slowly moves to advanced AI topics that companies want today. The real-world assignments helped me create a strong portfolio. This course gave me the confidence to move into a new field.

# *Why Students*
# CHOOSE US OVER COMPETITORS

### Arjun Shah

As a computer science student, I wanted a course based on current industry trends. This program from The IoT Academy was better than I expected. It taught me analytics, Generative AI, and Agentic AI in a simple and practical way. The course helped me learn skills that many students don't have yet. It really prepared me for internships and future jobs.

### Neha Reddy

I wanted to move into data-driven roles, and this course helped me a lot. The IoT Academy has created a clear and complete curriculum. The real business use cases made it easy for me to understand how companies use GenAI and Agentic AI. I could study without disturbing my work schedule. This course really helped me upgrade my skills.

### Vikas Kumar

I come from a non-technical background, so I was unsure about learning analytics. But the IoT Academy made everything simple. The trainers explained even tough AI concepts in an easy way. The projects helped me apply what I learned immediately. Now I feel ready for interviews and freelance work.

### Ananya Singh

After graduation, I was unsure about which path to choose. This course from The IoT Academy introduced me to analytics and AI in a simple and clear way. The mentors, step-by-step lessons, and real projects helped me build confidence. The curriculum is fully job-oriented and teaches exactly what companies want from freshers.
