The IoT Academy
Connecting The Unconnected

Advanced

DATA ANALYTICS PROGRAM WITH GEN AI & AGENTIC AI

Duration: **6 Months**

About

THE IOT ACADEMY

The IoT Academy, established in **2017** is a fast emerging company imparting quality programs for skills training, internship and guidance in cutting edge technologies like **Data Science, Machine Learning, Artificial Intelligence, Internet of Things, Embedded Systems & many more** and focused on helping people develop the skills they need to thrive in the rapidly growing digital economy.

The IoT Academy has collaborated with various premier institutes e.g. **E&ICT Academy, IIT-Roorkee, IIT-Guwahati and IIT-Kanpur** for **Advance Certification courses** to provide outcome-centric solutions to help them achieve their professional goals.

Happy Outcomes

Quality education and career opportunities shouldn't come at a high cost. While many ed-tech companies prioritize profits, **The IoT Academy** is committed to transforming students lives. We make premium professional education accessible to the masses at just 10% of the market cost.

The IoT Academy
Connecting The Unconnected

Forbes INDIA

We are proud to share that

The IoT Academy

has been featured in **Forbes India** under

- ✦ "Visionary Companies Building India's Future"
- ✦ Ranked #2 Nationwide

This recognition reflects our unwavering mission to empower learners with future-ready skills!

- ✦ From classrooms to careers...
- ✦ From learners to innovators...
- ✦ From ambition to achievement...

A heartfelt thank you to our students, mentors, industry partners, and community for trusting us and growing with us.

The journey has just begun.
Bigger milestones ahead.

AWARDS & RECOGNITIONS

AWARDS & RECOGNITIONS

FACULTY DEVELOPMENT PROGRAMS (FDPS)

- Conducted multiple intensive workshops for college faculty on AI-driven signal processing techniques.
- Delivered hands-on training using Edge Impulse, Python, and Hugging Face to build and deploy real-world AI models.
- Empowered educators to seamlessly integrate advanced AI/ML algorithms into their teaching and research.

INDUSTRIAL VISITS FOR STUDENTS

- Organized immersive visits to leading IoT manufacturing facilities and smart-factory labs.
- Enabled learners to observe real-world deployment of embedded systems, edge computing, and sensor networks.
- Fostered practical insights through direct interaction with industry engineers and live project demonstrations.

WHY THE IOT ACADEMY IS THE RIGHT CHOICE FOR YOU?

Navigate Your AI-Powered Analytics Journey with The IoT Academy

Just like building agentic AI systems requires advanced algorithms, sophisticated tools, and cutting-edge expertise - your AI-powered analytics career needs the right mentor, resources, and next-generation learning approach. The IoT Academy provides everything you need for this transformational AI journey.

Why Learn
GEN AI & AGENTIC AI FOR ANALYTICS?

- **Explosive Demand:** AI + Analytics jobs growing 40%+ annually through 2030
- **Premium Salaries:** AI-skilled analysts earn 80% more than traditional analysts
- **Future-Ready:** Agentic AI will automate 60% of analytics workflows by 2028
- **Innovation Leadership:** Build autonomous AI systems that make decisions
- **AI Advantage:** Create AI agents that analyze, predict, and act independently

WHY GEN AI & AGENTIC AI?
THE MARKET OPPORTUNITY

Top Job Recognition:

Updated to reflect AI Data Analytics as a top job in India, America (2026)

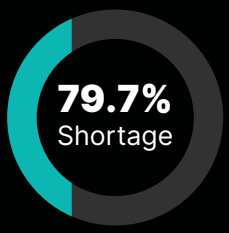

Job Title Recognition:

Changed to "Sexiest Job of the 21st Century" - AI & Data Analytics

Report By glassdoor

Shortage Statistics:

Updated to 79.7% shortage in AI professionals

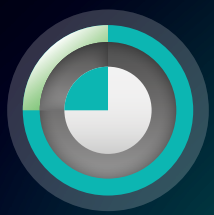

Market Growth:

- **45% CAGR Agentic AI market growth** in India.
- **40%+ annual job growth** through 2030
- Faster than growth for all occupations

Market Opportunity:

Added $1.3 trillion global Gen AI market by 2032 projection

$1.3 trillion Market

Branding:

Incorporated The IoT Academy positioning with these market-driven insights

PROGRAM CURRICULUM

Master Data Analytics + Gen AI & Agentic AI

Program Curriculum

MODULE 1

Excel for Data Analysis

- Excel basics: formulas, functions (VLOOKUP, INDEX/MATCH, IF, SUMIF)
- Pivot tables, charts, conditional formatting
- Data cleaning & preprocessing in Excel
- Mini Project: Analyze sales dataset with pivot tables & charts

MODULE 2

Python Fundamentals

- Python environment setup (Anaconda/Jupyter/VS Code)
- Variables, operators, data types
- Control flow (loops, conditionals)
- Functions & modules

MODULE 3

Python Data Structures & Libraries

- Lists, tuples, sets, dictionaries
- File handling (CSV, Excel, JSON)
- NumPy arrays and operations
- Mini Project: Basic Python ETL script

Program Curriculum

MODULE 4

Pandas for Data Handling

- Series & DataFrames
- Data cleaning: missing values, duplicates, data types
- Merging, grouping, aggregations
- Mini Project: Customer dataset cleaning & analysis

MODULE 5

Exploratory Data Analysis (EDA)

- Describe()
- Groupby()
- Crosstab()
- Boolean slicing/query()
- Data Manipulation & Cleaning
- Categorical Data Encoding
- Handling Date and Time

MODULE 6

Power BI

- Introduction to power bi
- Data visualization
- Power bi service, publishing & sharing
- Data transformation shaping & combining data
- Data modeling & DAX

Program Curriculum

MODULE 7

Tableau

- Tableau introduction
- Comparing tableau with power bi
- Dimension & measure
- Tableau charts
- Tableau filters
- Tableau dashboards
- Tableau story
- Calculated fields
- Publishing report to server

MODULE 8

Descriptive Statistics & Probability

- Mean, median, mode, variance, standard deviation
- Skewness, kurtosis
- Probability rules & distributions (Normal, Binomial, Poisson)
- Mini Project: Explore sales dataset distribution

MODULE 9

Inferential Statistics

- Sampling methods & Central Limit Theorem
- Confidence intervals
- Hypothesis testing (t-test, chi-square, ANOVA)
- Mini Project: A/B testing for marketing campaign

Program Curriculum

MODULE 10

SQL Fundamentals

- Introduction to relational databases
- SELECT, WHERE, ORDER BY
- Aggregation: SUM, AVG, COUNT, GROUP BY, HAVING
- Mini Project: SQL queries on HR dataset

MODULE 11

Advanced SQL

- Joins (INNER, LEFT, RIGHT, FULL)
- Subqueries & CTEs
- Window functions (ROW_NUMBER, RANK, LAG/LEAD)
- Mini Project: Customer purchase analysis with SQL

MODULE 12

Data Visualization with Python

- Matplotlib basics (line, bar, scatter, histograms)
- Seaborn for statistical plots (boxplot, violin, heatmap)
- Visualization best practices

Program Curriculum

MODULE 13

Advanced Visualization & Dashboards

- Seaborn advanced plots (pairplot, jointplot)
- Time series visualization
- Excel dashboards (interactive charts, slicers)
- **Mini Project:** Sales dashboard in Excel

MODULE 14

Business Analytics Concepts

- Difference: Data Analytics vs Business Analytics
- Types: descriptive, diagnostic, predictive, prescriptive analytics
- Identifying KPIs & business metrics
- Mini Project: Define business KPIs for a retail dataset

MODULE 15

Business Case Study

- Retail sales optimization
- Customer segmentation basics (RFM analysis)
- Case Study Project: Analyze retail dataset, present insights

Program Curriculum

MODULE 16

End-to-End Data Workflow

Collect → Clean → Analyze → Visualize → Business Insights
Integrating Python + SQL + Excel in projects
Mini Project: Marketing data analysis pipeline

MODULE 17

Domain Mini-Projects

- Finance: Risk analysis
- Retail: Product performance analysis
- HR: Attrition analysis
- Students pick 1 domain project

MODULE 18

Capstone Project (Development Phase)

- Problem definition
- Data exploration & cleaning
- Applying statistics, SQL, visualization
- Draft insights & business recommendations

Program Curriculum

MODULE 19

Capstone Presentation & Portfolio

- Final capstone project presentation
- Peer/instructor feedback
- Portfolio preparation (GitHub, LinkedIn, Resume)
- Mock interview with business case discussion

MODULE 20

Introduction to Generative AI

- What is Generative AI? (text, images, audio, code)
- LLM basics: GPT, LLaMA, Mistral
- Key use cases in business & analytics

MODULE 21

Prompt Engineering

- Types of prompts (zero-shot, few-shot, chain-of-thought, role prompting)
- Prompt optimization techniques
- Hands-on: Build a chatbot with OpenAI API / HuggingFace

Program Curriculum

MODULE 22

GenAI Tools for Data Professionals

- Using GenAI for data cleaning & transformation (pandas + AI assist)
- Automating SQL query generation with LLMs
- AI-assisted visualization & storytelling
- Mini Project: “Ask the Data” AI assistant (text-to-SQL or text-to-chart)

MODULE 23

Building with Generative AI

- Fine-tuning vs. prompt-tuning basics
- Using vector databases (Pinecone, FAISS) for RAG (Retrieval Augmented Generation)
- Business use cases: Customer insights assistant, automated reporting
- Mini Project: RAG-based business Q&A bot

MODULE 24

Agentic AI Concepts

- What is an AI Agent? (autonomy, memory, reasoning, tool use)
- Frameworks: LangChain, LlamaIndex, AutoGPT
- Multi-agent systems overview

Program Curriculum

MODULE 25

AI Agents for Data & Business

- Agents that query SQL databases automatically
- Agents for reporting & visualization generation
- Business scenarios: Automating customer queries, HR analytics assistant
- Hands-on: Build an AI agent that pulls from SQL + generates report

MODULE 26

Advanced Agentic AI Workflows

- Orchestration of multiple agents
- Combining APIs, databases, and analytics workflows
- AI copilots for decision support (finance, marketing, operations)
- Mini Project: Agent for marketing campaign analysis

MODULE 27

Generative AI + Agentic AI Capstone

- **Choose a real-world project:**
  1. AI-powered sales forecasting assistant
  2. Customer support AI agent with knowledge base
  3. Automated financial dashboard generator
  4. Churn prediction + AI insights explainer
- **Final presentation + portfolio setup (GitHub/LinkedIn)**

AGENTIC AI SPECIALIZATION

Master the Future of AI Automation

Agentic AI represents the next frontier in artificial intelligence - systems that can reason, plan, and act autonomously to achieve complex goals. Our specialized curriculum teaches you to build AI agents that don't just analyze data but take intelligent actions, make decisions, and continuously improve their performance.

Agentic AI Capabilities You'll Build:

- Multi-agent collaborative systems
- Autonomous decision-making workflows
- Self-improving AI algorithms
- Context-aware intelligent agents
- Enterprise AI automation solutions

You'll learn to create AI systems that can understand business contexts, analyze complex scenarios, generate insights, and take appropriate actions without human intervention. This positions you at the forefront of AI innovation, preparing you for leadership roles in the emerging agentic AI economy.

TOOLS YOU WILL MASTER WITH AI STACK

SKILLS YOU WILL MASTER

- Data Visualization
- Data Manipulation
- Data Analysis
- Exploratory Data Analysis (EDA)
- Business Analysis
- Agentic AI
- Statistics & Probability
- Prompt Engineering
- Generative AI

Live Industry-Based Projects

Industry projects are an important part of the Advanced Program in Advanced Program in Applied Data Analytics & Generative AI. These projects let you work on real problems from real companies. You get hands-on experience in data analytics and generative AI. This helps you learn practical skills and solve tough problems in different industries.

Sales Forecasting Agent

Description: Build an agent that cleans sales data and auto-generates future forecasts using Gen AI.

Tools and Technologies: Python, Pandas, Prophet, OpenAI API.

Outcomes: Automated forecasting reports with predictive charts.

Customer Churn Analysis with AI Insights

Description: Train a churn model and let an LLM explain trends and reasons in natural language.

Tools and Technologies: PSQL, Python, Scikit-learn, Gen AI Insight Generator.

Outcomes: Human-readable churn report with actionable recommendations.

Live Industry-Based Projects

AI-Powered Data Cleaning Bot

Description: Create an agent that detects missing values, outliers, duplicates, and fixes them automatically.

Tools and Technologies: Python, Pandas, LangChain, OpenAI API.

Outcomes: Clean, analysis-ready datasets generated by an autonomous AI agent.

Automated Marketing Dashboard with AI Narration

Description: Build dashboards and integrate an LLM to auto-explain KPIs in text.

Tools and Technologies: Power BI/Tableau, Python, Gen AI.

Outcomes: Interactive dashboards with AI-generated performance summaries.

Financial Fraud Detection with AI Explanations

Description: Train a fraud model and use Gen AI to interpret risky transactions in plain language.

Tools and Technologies: Python, Scikit-learn, SHAP, Gen AI

Outcomes: Train a fraud model and use Gen AI to interpret risky transactions in plain language.

Live Industry-Based Projects

HR Analytics Agent for Attrition Prediction

Description: Build an agent that pulls HR data, runs predictions, and mails insights weekly.

Tools and Technologies: SQL, Python, ML Models, Agentic Workflow Automation

Outcomes: Auto-generated weekly HR attrition reports.

AI-Based Product Recommendation System

Description: Build a recommender and use Gen AI to generate personalized recommendation explanations.

Tools and Technologies: Python, Surprise/LightFM, Gen AI.

Outcomes: Smart recommendation engine with human-like reasoning.

Automated EDA (Exploratory Data Analysis) Agent

Description: Create an agent that performs EDA and generates charts + a written summary.

Tools and Technologies: Python, Pandas-Profiling, LangChain, LLMs.

Outcomes: Train a fraud model and use Gen AI to interpret risky transactions in plain language.

Live Industry-Based Projects

Social Media Sentiment Insights with AI

Description: Analyze brand sentiment and let Gen AI produce a sentiment intelligence report.

Tools and Technologies: Python, NLP, HuggingFace Models, OpenAI API.

Outcomes: AI-written brand reputation analysis.

AI Query Assistant for Business Data

Description: Build a chatbot that answers questions from company data using natural language.

Tools and Technologies: Vector DB, RAG + Agentic AI.

Outcomes: Interactive data assistant for real-time business insights.

WHO SHOULD JOIN THIS PROGRAM?

Students & Freshers

Who wants to start a career in Data Analytics, AI, and Automation with job-ready skills.

Working Professionals

Looking to upgrade from traditional analytics to Gen AI–powered workflows.

Data Analysts

Who wants to adopt AI automation, agentic systems, and LLM-driven insights.

Business Analysts

Needing faster, deeper insights with AI-driven dashboards and reporting agents.

Developers & Programmers

Interested in building AI tools, agents, and intelligent data apps.

Career Switchers

From ANY background—who wants a high-demand, future-proof tech career path.

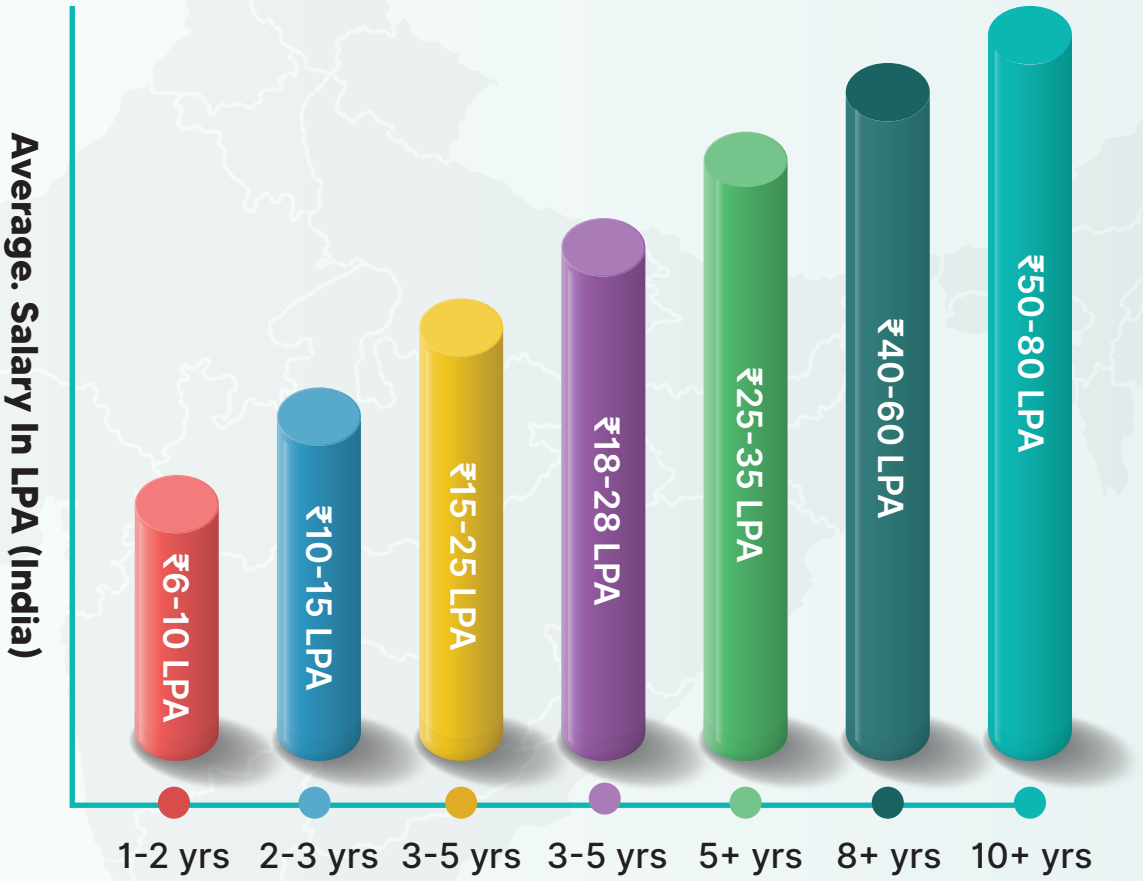

Entrepreneurs & Startup Founders

Wanting to use data + AI to automate processes, make smarter decisions, and build AI-powered products.

Freelancers

Looking to offer high-value services like AI dashboards, automation bots, and analytics solutions.

CAREER ROLES & SALARIES

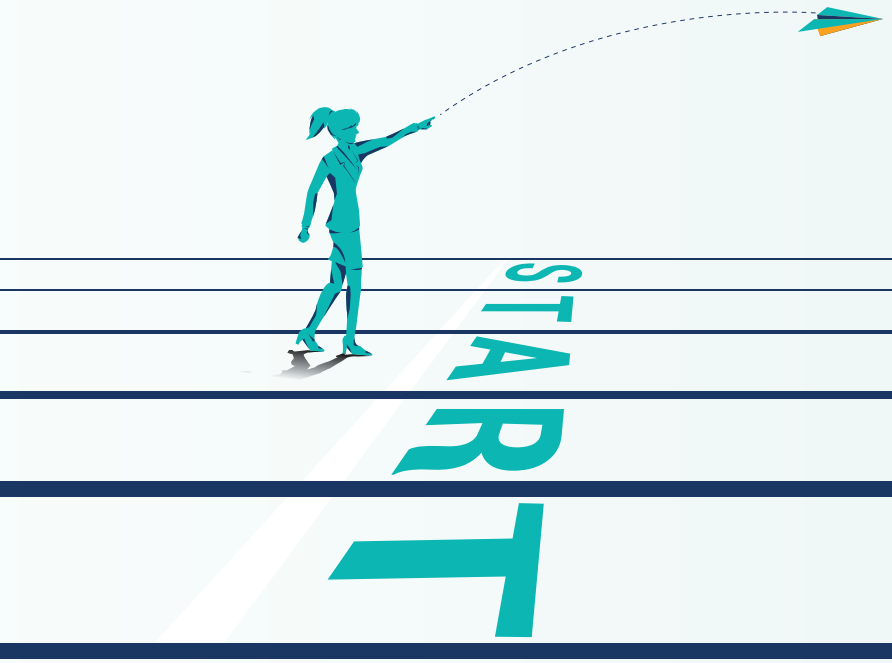

- AI-Powered Data Analys
- Gen AI Analytics Specialist
- AI Solutions Architect
- Agentic AI Developer
- AI Product Manager (Analytics)
- Chief AI Officer
- AI Consulting Director

Career Growth Path:

AI Analyst → AI Specialist → AI Architect → AI Manager → AI Director → Chief AI Officer

CAREER TRAJECTORY

Experience Level	Experience	Average Salary (India)
AI Data Analyst (0-2 yr)	Entry Level	₹5–8 LPA
AI Data Specialist (2-4 yr)	Mid Level	₹10–15 LPA
AI Data Scientist (5-7 yr)	Senior Level	₹18–25 LPA
AI Analytics Manager (8+ yr)	Leadership	₹30+ LPA
Chief Data Officer (12+ yr)	Executive	₹50–80 LPA

START CAREER WITH DATA ANALYTICS COURSE

PLACEMENT SUPPORT

WE

400+ AI-Ready Hiring Partner Opportunities

Access our vast network of 400+ hiring partners actively seeking AI-skilled professionals across technology, fintech, healthtech, and AI startups, giving you premium opportunities in emerging AI roles.

AI-Specific Interview Preparation

Practice with real Gen AI and Agentic AI interview questions, system design problems, and AI ethics discussions to boost confidence for technical rounds at top AI companies and startups.

AI Portfolio, GitHub & LinkedIn Building

Get expert guidance to create a powerful AI-focused portfolio showcasing your Gen AI and Agentic AI projects, optimize LinkedIn for AI roles, and build a professional GitHub with advanced AI implementations.

Specialized AI Alumni Network

Leverage our 6,200+ alumni network, including AI specialists working at Google, Microsoft, OpenAI, and leading AI startups to get trusted referrals and unlock exclusive AI job opportunities.

WANT YOU

CAREER SUPPORT & AI CAREER GUIDANCE

Discover AI Strengths & Specialization

Every learner has unique problem-solving abilities and technical aptitudes, but many are unsure how to apply them in AI-powered roles. Through AI project assessments, algorithm implementations, and specialized mentoring, we help learners discover their AI strengths and specialization areas.

Explore AI Career Paths

The AI analytics field offers diverse opportunities from Gen AI development to agentic AI architecture. We provide detailed insights into various AI roles, emerging technologies, and career progression paths in AI-powered analytics, machine learning engineering, and AI product management.

Prepare for Advanced AI Interviews

AI interviews test both technical depth and innovative thinking. Our structured preparation includes LLM fine-tuning practice, agentic AI system design, Gen AI ethics discussions, and advanced AI coding challenges with personalized feedback to build confidence.

Build AI-Focused Portfolios

Employers want to see real AI implementations, not just theoretical knowledge. We guide learners in building comprehensive AI portfolios with agentic systems, Gen AI applications, and innovative AI solutions that demonstrate their ability to build autonomous, intelligent systems.

How to Enroll & Next Steps

ENROLLMENT PROCESS

Step 1: Free AI Consultation

- Book a free AI career counseling session
- Understand your AI analytics goals and program fit assessment

Step 2: Technical Assessment & Demo Clas

- Complete basic Python/AI aptitude test
- Attend one free Gen AI demo class with hands-on agentic AI examples

Step 3: Enrollment & AI Track Selection

- Choose your specialization track and batch timing
- Complete admission formalities with technical background verification

Step 4: Begin AI Transformation

- Start your AI-powered analytics journey
- Access lifetime AI updates, support system and specialized alumni network

Next Batch Details:
Batch Start Date: Every Monday

Class Timings:
Weekday Batch: **7:00 PM - 9:00 PM**
Weekend Batch: **10:00 AM - 1:00 PM**

Mode:
Live Online + Offline (Noida Center)

Batch Size:
Limited to 12 students

PROGRAM FEE

₹45,999 (Including GST)

Scholarship Available Upto 30%

(Scholarship is granted based on the candidate's Work Experience, Statement of Purpose,and Academic Background.)

Payment Options

01 Full Fee Payment

1. Total Fee Payment: ₹45,999 (Including GST)
2. Admission Fees (payable on enrolment): ₹1,000

02 Installment Plan

1. Total Fee Payment: ₹45,999 (Including GST)
2. Admission Fees (payable on enrolment): ₹1,000
3. No. of Installments: 3 & 4 Months

Note:

- *Full fee will be divided into 3 or 4 monthly installments after deducting the scholarship awarded*
- *Contact your counselor for more details*

03 Loan & EMI Option

1. Total Fee Payment: ₹45,999 (Including GST)
2. Admission Fees (payable on enrolment): ₹1,000
3. Loan Amount: ₹44,999
4. No-Cost EMI Available: 3 Months & 4 Months

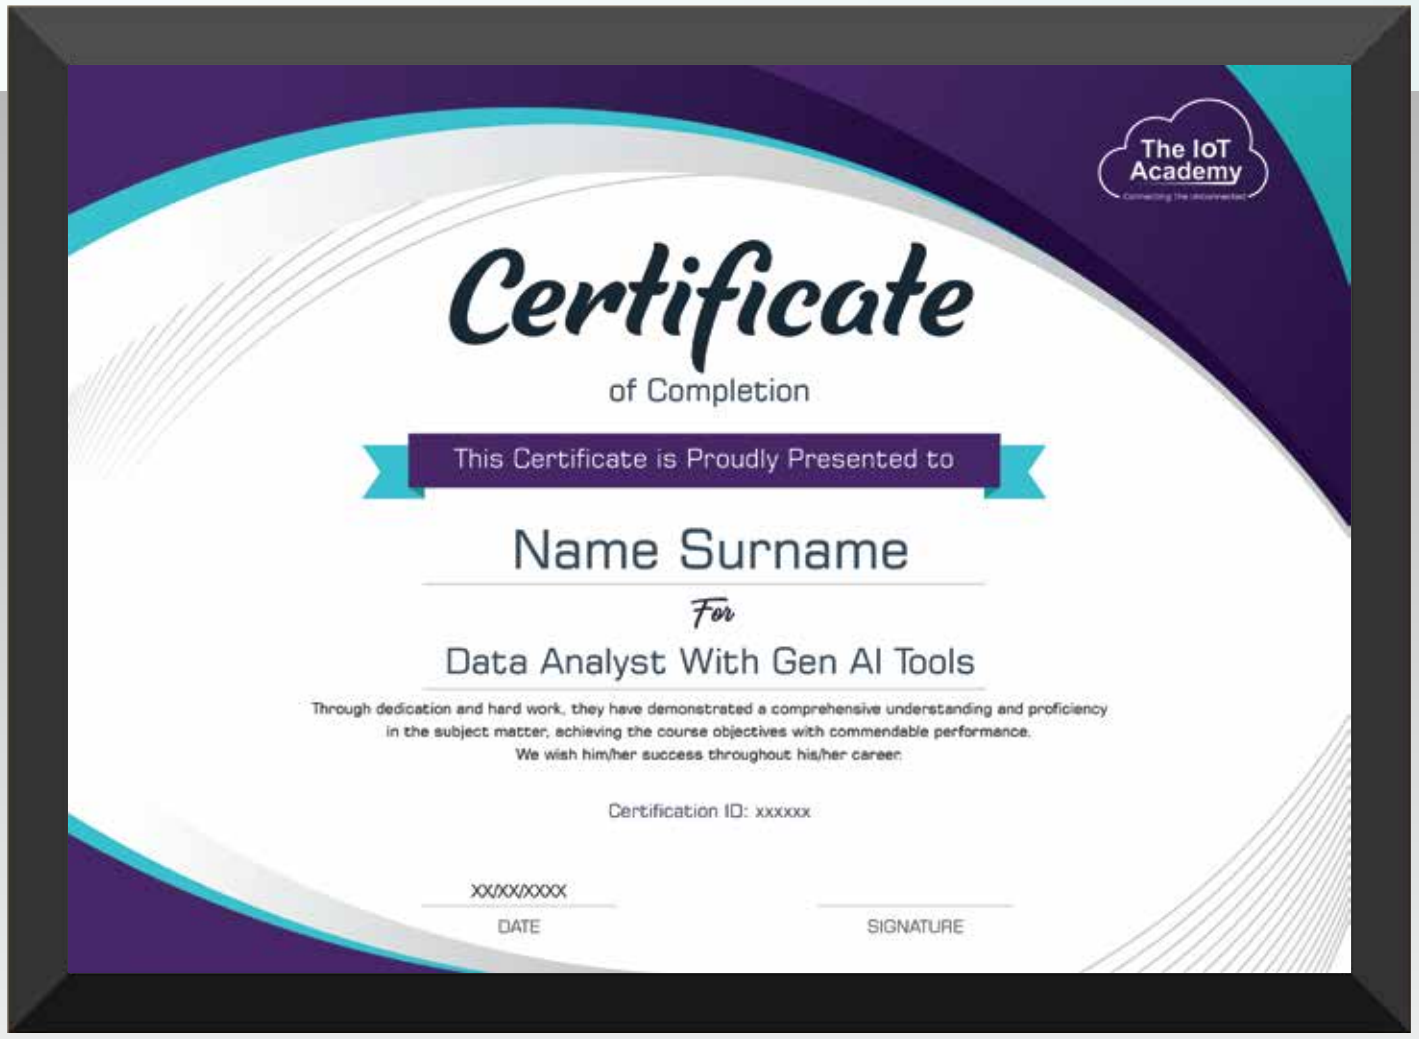

Note:

- *Full fee will be divided into 3 or 4 monthly EMIs after deducting the scholarship awarded*
- *Choose from our financing partners for interest-free EMI options*
- *Contact your counselor for more details*

Data Analytics with Gen AI Certification

Why These AI Certifications Matter?

- Industry-Recognized Credential endorsed by NASSCOM's FutureSkills Prime platform.
- Validates job-ready skills aligned with India's National Skills Framework (NSQF).
- Enhances employability with government-backed digital skills certification.
- Mapped to industry standards set by top tech companies and IT bodies.
- Boosts professional credibility with a nationally accepted qualification.
- Certifies mastery of emerging technologies demanded by leading employers.
- Supports career growth with proof of competency in specialized domains.
- Eligible for government incentives under the FutureSkills Prime program (where applicable).
- Adds weight to resumes & LinkedIn profiles for stronger job visibility.
- Recognized across IT, analytics, and AI-driven industries for recruitment and upskilling.

ONE-DAY IMMERSION PROGRAM
DEDICATED AI LAB EXPERIENCE

Explore Advanced AI Devices & Vision Systems

Get hands-on with smart helmet detection setups, high-resolution computer vision cameras, real-time detection systems, and multimodal AI stations used in modern industries.

Learn Real Computer Vision Workflows

Experience end-to-end AI tasks such as live helmet detection, object/face recognition, video analytics, and scene interpretation under expert guidance.

Build Your Own AI Mini Project

Create a functional AI prototype in one day—like a helmet detection model, face-ID access system, AI surveillance tool, or vision-enabled AI assistant—to add to your portfolio.

Get Expert Review & Official Certification

Receive mentor feedback, participate in a time-bound AI challenge, present your model, and earn a One-Day AI Immersion Certificate showcasing practical AI skills.

THE IoT ACADEMY VS OTHERS

Factors	The IoT Academy	Other Institutes
Founder Background	IIT Alumni	Varied
Batch Size	10-15 students	50-100 students
Fee Structure	₹46,999 (with EMI)	₹70,000-₹1,00,000
Gen AI & Agentic AI Training	Comprehensive & Latest	Limited/Outdated
1:1 Mentorship	Daily sessions	Group sessions only
Placement Rate	95% success rate	60-70% average
Industry Partnerships	IIT + 400+ AI companies	Limited
AI Projects	Real agentic AI systems	Simulated/Basic projects

Why Students
CHOOSE US OVER COMPETITORS

Rohan Mehta

As a final-year student, I was confused about my career. This course from The IoT Academy gave me clear direction. The Data Analytics with Generative AI and Agentic AI lessons were easy to understand. The practical projects helped me improve my resume and do better in placements. I finally understood how analytics works in real companies. This course truly prepared me for the job market.

Priya Nair

I have been working in operations for five years, and I wanted to upgrade my skills. The IoT Academy's course on Data Analytics with Generative AI and Agentic AI was perfect for me. The lessons are simple, practical, and based on real company needs. The case studies helped me use new techniques at work immediately. This course is not just theory — it is really useful and job-focused.

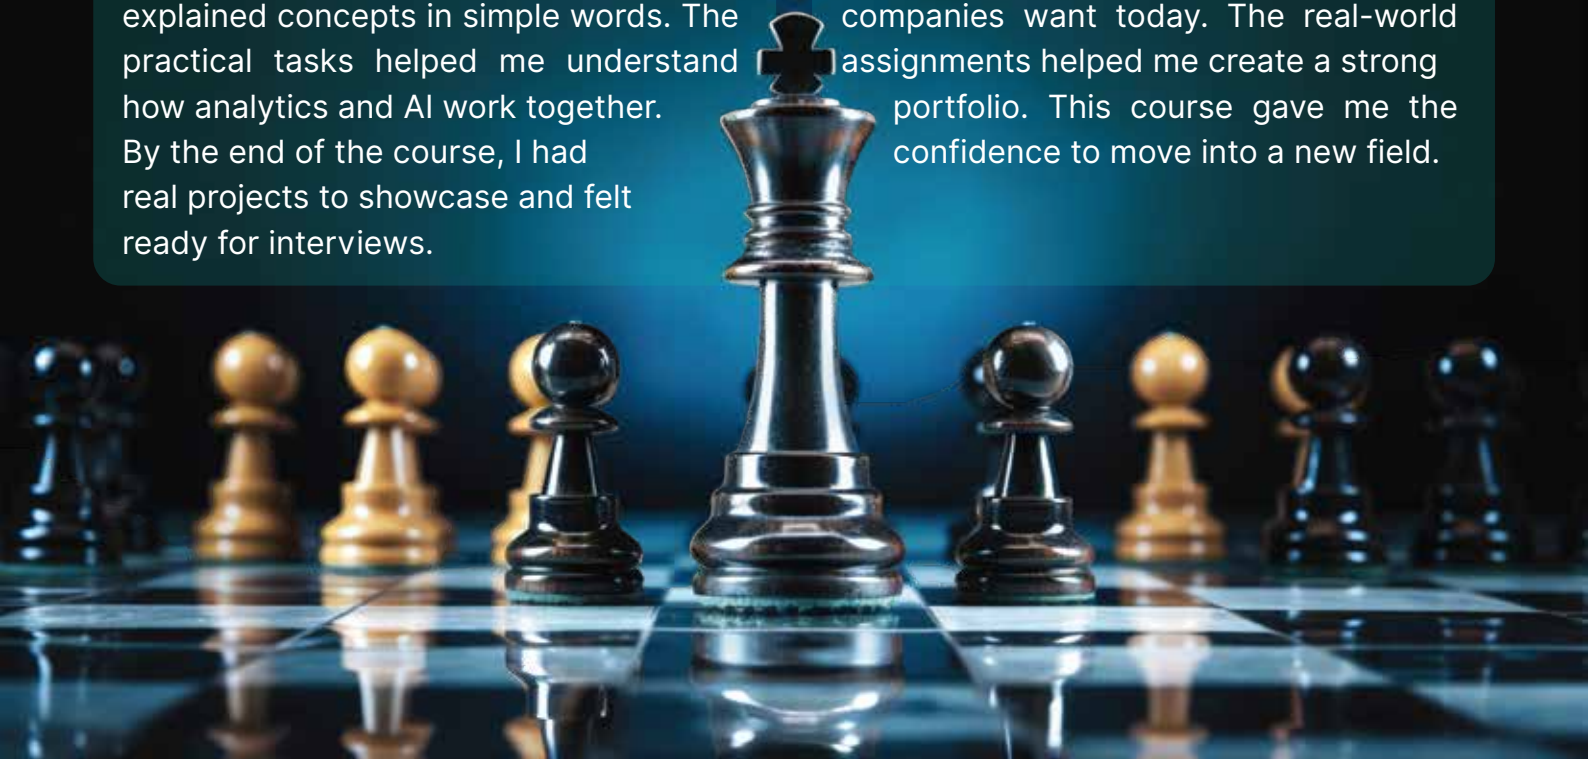

Sneha Kulkarni

As a fresher, I felt I did not have the skills recruiters look for. But The IoT Academy's Data Analytics with Generative AI and Agentic AI course changed everything. The mentors explained concepts in simple words. The practical tasks helped me understand how analytics and AI work together. By the end of the course, I had real projects to showcase and felt ready for interviews.

Amit Sinha

I wanted to switch careers, but I was nervous. After joining this course from The IoT Academy, things became easier. The training starts from the basics and slowly moves to advanced AI topics that companies want today. The real-world assignments helped me create a strong portfolio. This course gave me the confidence to move into a new field.

Why Students
CHOOSE US OVER COMPETITORS

Arjun Shah

As a computer science student, I wanted a course based on current industry trends. This program from The IoT Academy was better than I expected. It taught me analytics, Generative AI, and Agentic AI in a simple and practical way. The course helped me learn skills that many students don't have yet. It really prepared me for internships and future jobs.

Neha Reddy

I wanted to move into data-driven roles, and this course helped me a lot. The IoT Academy has created a clear and complete curriculum. The real business use cases made it easy for me to understand how companies use GenAI and Agentic AI. I could study without disturbing my work schedule. This course really helped me upgrade my skills.

Vikas Kumar

I come from a non-technical background, so I was unsure about learning analytics. But the IoT Academy made everything simple. The trainers explained even tough AI concepts in an easy way. The projects helped me apply what I learned immediately. Now I feel ready for interviews and freelance work.

Ananya Singh

After graduation, I was unsure about which path to choose. This course from The IoT Academy introduced me to analytics and AI in a simple and clear way. The mentors, step-by-step lessons, and real projects helped me build confidence. The curriculum is fully job-oriented and teaches exactly what companies want from freshers.
