Curriculum

Prompt Egineering And Generative AI

Module	Topics Covered
GenAI Landscape	Overview of GenAI, LLMs (GPT, Gemini, Claude, LLaMA), Transformers & Attention basics
Prompt Engineering Fundamentals	Zero-shot, one-shot, few-shot prompting, instruction prompting, role prompting
Advanced Prompting Techniques	Chain-of-Thought (CoT), Tree-of-Thought, ReAct prompting, meta-prompting
Prompt Design for Real Use Cases	Prompts for content creation, coding, summarization, Q&A, data extraction
Working with APIs (OpenAI / Gemini)	API setup, parameters (temperature, top-p, tokens), Python API calls
RAG – Retrieval Augmented Generation	Vector databases (ChromaDB/Pinecone), embeddings, document Q&A systems
LangChain & AI Agents	LangChain basics, chains, agents, memory, tool use
Capstone: Build an AI App	Build a GenAI-powered chatbot or content tool using LangChain + Streamlit
