BECOME A JOB-READY

DATA ANALYST WITH GENAI & AGENTIC AI

6-MONTH LIVE CAREER PROGRAM

Master Excel, SQL, Python, Power BI, GenAI & Agentic AI

10+ Real-World Projects | 1:1 Mentorship | Career & Placement Support

95% Placement Rate | 400+ Hiring Partners | 6,200+ Alumni |
₹35 LPA Highest Package

WHY DATA ANALYTICS + GENAI + AGENTIC AI?

Data Analytics

Build strong foundations in Excel, SQL, Python, Statistics and Power BI.

Generative AI

Use GenAI tools to analyse data, generate insights and automate repetitive tasks.

Agentic AI

Learn to build AI-powered workflows and agents that can analyse data and take actions.

One program. Three skill levels. One career path.

ABOUT THE IOT ACADEMY

The IoT Academy, established in **2017** is a fast emerging company imparting quality programs for skills training, internship and guidance in cutting edge technologies like **Data Science, Machine Learning, Artificial Intelligence, Internet of Things, Embedded Systems & many more** and focused on helping people develop the skills they need to thrive in the rapidly growing digital economy.

The IoT Academy has collaborated with various premier institutes e.g. **E&ICT Academy, IIT-Roorkee, IIT-Guwahati and IIT-Kanpur** for **Advance Certification courses** to provide outcome-centric solutions to help them achieve their professional goals.

Quality education and career opportunities shouldn't come at a high cost. While many ed-tech companies prioritize profits, **The IoT Academy** is committed to transforming students lives. We make premium professional education accessible to the masses at just 10% of the market cost.

WHY STUDENTS CHOOSE THE IOT ACADEMY

Small Batches
Learn with personalised attention instead of mass-batch training.

IIT Alumni Leadership
Learn from an organisation founded by IIT alumni.

GenAI + Agentic AI
Go beyond traditional Data Analytics with AI-powered workflows and agents.

Real-World Projects
Build practical projects that can be added to your portfolio.

1:1 Mentorship
Get personalised guidance throughout the program.

Career Support
Resume, LinkedIn, GitHub, interview preparation and placement assistance.

Connecting The Unconnected

Forbes INDIA

We are proud to share that

The IoT Academy

has been featured in **Forbes India** under

- ✦ "Visionary Companies Building India's Future"
- ✦ Ranked #2 Nationwide

This recognition reflects our unwavering mission to empower learners with future-ready skills!

- ✦ From classrooms to careers...
- ✦ From learners to innovators...
- ✦ From ambition to achievement...

A heartfelt thank you to our students, mentors, industry partners, and community for trusting us and growing with us.

The journey has just begun. Bigger milestones ahead.

GO BEYOND DATA ANALYTICS WITH AGENTIC AI

Traditional Data Analyst

Data → SQL → Dashboard → Report

AI-Powered Data Analyst

Data → AI → Insights → Recommendations

Agentic Data Analyst

Goal → AI Agent → Data → Analysis → Decision → Action

What You'll Build

- SQL Analytics Agent
- Data Analysis Agent
- Reporting Agent
- Business Intelligence Agent
- Multi-Agent Analytics Workflow

Learn to build AI systems that don't just analyse data they help automate the work around it.

FROM LEARNING TO GETTING INTERVIEW-READY

Build Skills
Live classes + practical assignments
01

Build Projects
Real-world analytics + AI projects
02

Build Your Portfolio
GitHub + LinkedIn + Project Portfolio
03

Prepare for Interviews
Technical + HR Mock Interviews
04

Improve Your Resume
Resume building and optimisation
05

Apply With Confidence
Job application and placement assistance
06

CAREER & PLACEMENT SUPPORT

WE

- Resume Building
- LinkedIn Profile Optimisation
- GitHub Portfolio
- Interview Preparation
- HR Mock Interviews
- Technical Mock Interviews
- Placement Assistance
- Job Application Guidance

WANT YOU

ENROLLMENT PROCESS

Step 1: Free AI Consultation

- Book a free AI career counseling session
- Understand your AI analytics goals and program fit assessment

Step 2: Technical Assessment & Demo Class

- Complete basic Python/AI aptitude test
- Attend one free Gen AI demo class with hands-on agentic AI examples

Step 3: Enrollment & AI Track Selection

- Choose your specialization track and batch timing
- Complete admission formalities with technical background verification

Step 4: Begin AI Transformation

- Start your AI-powered analytics journey
- Access lifetime AI updates, support system and specialized alumni network

WHAT OUR LEARNERS ACHIEVED

Rohan Mehta

As a final-year student, I was confused about my career. This course from The IoT Academy gave me clear direction. The Data Analytics with Generative AI and Agentic AI lessons were easy to understand. The practical projects helped me improve my resume and do better in placements. I finally understood how analytics works in real companies. This course truly prepared me for the job market.

DATA ANALYTICS WITH GEN AI
CERTIFICATION

Why These Certifications Matter

- Validates job-ready skills aligned with India's National Skills Framework (NSQF).
- Enhances employability with government-backed digital skills certification.
- Mapped to industry standards set by top tech companies and IT bodies.
- Boosts professional credibility with a nationally accepted qualification.
- Certifies mastery of emerging technologies demanded by leading employers.
- Supports career growth with proof of competency in specialized domains.
- Eligible for government incentives under the FutureSkills Prime program (where applicable).
- Adds weight to resumes & LinkedIn profiles for stronger job visibility.
- Recognized across IT, analytics, and AI-driven industries for recruitment and upskilling.

Certification ID: xxxxxxx

The IoT Academy

The IoT Academy

CERTIFICATE OF COMPLETION

This is to certify that Mr./Ms.

Full Name

has successfully completed the online

Data Analytics & Generative AI Job Bootcamp

organized by The IoT Academy
held from xx/xx/xxxx to xx/xx/xxxx

Through dedication and hard work, he/she has demonstrated a comprehensive understanding and proficiency in achieving the program objectives.
By completing this program, he/she has exhibited commendable performance.
We wish him/her success throughout his/her career.

WHO CAN JOIN THIS PROGRAM?

STUDENTS & FRESHERS
Build job-ready analytics skills from the ground up.

WORKING PROFESSIONALS
Add AI-powered analytics skills to your current profile.

CAREER SWITCHERS
Move into Data Analytics through a structured learning path.

DATA / BUSINESS ANALYSTS
Upgrade your existing analytics skills with GenAI and Agentic AI.

DEVELOPERS
Add analytics, GenAI and AI-agent capabilities to your technical profile.

CAREER PATHS AFTER THE PROGRAM

- Data Analyst
- Business Analyst
- BI Analyst
- Reporting Analyst
- Data Analytics Consultant
- AI-Powered Data Analyst
- GenAI / Analytics Associate

WHAT YOU WILL BE ABLE TO DO

WHAT YOU WILL BE ABLE TO DO

- Analyse and clean real-world datasets
- Write SQL queries for business problems
- Use Python and Pandas for data analysis
- Build interactive Power BI dashboards
- Apply statistics to business problems
- Use GenAI for data analysis and productivity
- Build RAG-based applications
- Build AI agents for analytics workflows
- Create a GitHub-based project portfolio
- Present your projects confidently in interviews

YOUR 6-MONTH LEARNING JOURNEY

PHASE 1

Analytics Foundations

Excel | Data Cleaning | Business Problems

PHASE 2

Data Analytics Core

SQL | Python | Pandas | EDA

PHASE 3

Business Intelligence

Power BI | Tableau | DAX | Dashboards

PHASE 4

Statistics & Business Analytics

Statistics | Hypothesis Testing | KPIs | Business Cases

PHASE 5

Generative AI

Prompt Engineering | LLMs | RAG | AI-assisted Analytics

PHASE 6

Agentic AI

AI Agents | Tool Calling | SQL Agents | Multi-Agent Workflows

PHASE 7

Career Launch

Capstone | Portfolio | GitHub | LinkedIn | Mock Interviews

MODULE 1

Excel for Data Analysis

- Excel basics: formulas, functions (VLOOKUP, INDEX/MATCH, IF, SUMIF)
- Pivot tables, charts, conditional formatting
- Data cleaning & preprocessing in Excel
- **Mini Project:** Analyze sales dataset with pivot tables & charts

MODULE 2

Python Fundamentals

- Python environment setup (Anaconda/Jupyter/VS Code)
- Variables, operators, data types
- Control flow (loops, conditionals)
- Functions & modules

MODULE 3

Python Data Structures & Libraries

- Lists, tuples, sets, dictionaries
- File handling (CSV, Excel, JSON)
- NumPy arrays and operations
- **Mini Project:** Basic Python ETL script

MODULE 4

Pandas for Data Handling

- Series & DataFrames
- Data cleaning: missing values, duplicates, data types
- Merging, grouping, aggregations
- **Mini Project:** Customer dataset cleaning & analysis

MODULE 5

Descriptive Statistics & Probability

- Mean, median, mode, variance, standard deviation
- Skewness, kurtosis
- Probability rules & distributions (Normal, Binomial, Poisson)
- **Mini Project:** Explore sales dataset distribution

MODULE 6

Inferential Statistics

- Sampling methods & Central Limit Theorem
- Confidence intervals
- Hypothesis testing (t-test, chi-square, ANOVA)
- **Mini Project:** A/B testing for marketing campaign

MODULE 7

SQL Fundamentals

- Introduction to relational databases
- SELECT, WHERE, ORDER BY
- Aggregation: SUM, AVG, COUNT, GROUP BY, HAVING
- **Mini Project:** SQL queries on HR dataset

MODULE 8

Advanced SQL

- Joins (INNER, LEFT, RIGHT, FULL)
- Subqueries & CTEs
- Window functions (ROW_NUMBER, RANK, LAG/LEAD)
- **Mini Project:** Customer purchase analysis with SQL

MODULE 9

Data Visualization with Python

- Matplotlib basics (line, bar, scatter, histograms)
- Seaborn for statistical plots (boxplot, violin, heatmap)
- Visualization best practices

MODULE 10

Advanced Visualization & Dashboards

- Seaborn advanced plots (pairplot, jointplot)
- Time series visualization
- Excel dashboards (interactive charts, slicers)
- **Mini Project:** Sales dashboard in Excel

MODULE 11

Business Analytics Concepts

- Difference: Data Analytics vs Business Analytics
- Types: descriptive, diagnostic, predictive, prescriptive analytics
- Identifying KPIs & business metrics
- **Mini Project:** Define business KPIs for a retail dataset

MODULE 12

Business Case Study

- Retail sales optimization
- Customer segmentation basics (RFM analysis)
- Case Study Project: Analyze retail dataset, present insights

MODULE 13

End-to-End Data Workflow

- Collect → Clean → Analyze → Visualize → Business Insights
- Integrating Python + SQL + Excel in projects
- Mini Project: Marketing data analysis pipeline

MODULE 14

Domain Mini-Projects

- Finance: Risk analysis
- Retail: Product performance analysis
- HR: Attrition analysis
- Students pick 1 domain project

MODULE 15

Capstone Project (Development Phase)

- Problem definition
- Data exploration & cleaning
- Applying statistics, SQL, visualization
- Draft insights & business recommendations

MODULE 16

Capstone Presentation & Portfolio

- Final capstone project presentation
- Peer/instructor feedback
- Portfolio preparation (GitHub, LinkedIn, Resume)
- Mock interview with business case discussion

TOOLS YOU WILL MASTER

DATA ANALYTICS

- Excel
- SQL
- python
- pandas
- tableau

GENERATIVE AI

- ChatGPT
- Claude
- Gemini
- OpenAI

AI / LLM

- RAG
- ECTOR DATABASES
- LLM APPLICATIONS

AGENTIC AI

- LlamaIndex
- LangChain
- AutoGen
- AI AGENTS

BUILD REAL-WORLD AI ANALYTICS PROJECTS

Industry projects are an important part of the Data Analytics & Generative AI. These projects let you work on real problems from real companies. You get hands-on experience in data analytics and generative AI. This helps you learn practical skills and solve tough problems in different industries.

Sales Forecasting Agent

Description: Build an agent that cleans sales data and auto-generates future forecasts using Gen AI.

Tools and Technologies: Python, Pandas, Prophet, OpenAI API.

Outcomes: Automated forecasting reports with predictive charts.

Customer Churn Analysis with AI Insights

Description: Train a churn model and let an LLM explain trends and reasons in natural language.

Tools and Technologies: PSQL, Python, Scikit-learn, Gen AI Insight Generator.

Outcomes: Human-readable churn report with actionable recommendations.

AI-Powered Data Cleaning Bot

Description: Create an agent that detects missing values, outliers, duplicates, and fixes them automatically.

Tools and Technologies: Python, Pandas, LangChain, OpenAI API.

Outcomes: Clean, analysis-ready datasets generated by an autonomous AI agent.

Automated Marketing Dashboard with AI Narration

Description: Build dashboards and integrate an LLM to auto-explain KPIs in text.

Tools and Technologies: Power BI/Tableau, Python, Gen AI.

Outcomes: Interactive dashboards with AI-generated performance summaries.

Financial Fraud Detection with AI Explanations

Description: Train a fraud model and use Gen AI to interpret risky transactions in plain language.

Tools and Technologies: Python, Scikit-learn, SHAP, Gen AI

Outcomes: Train a fraud model and use Gen AI to interpret risky transactions in plain language.

HR Analytics Agent for Attrition Prediction

Description: Build an agent that pulls HR data, runs predictions, and mails insights weekly.

Tools and Technologies: SQL, Python, ML Models, Agentic Workflow Automation

Outcomes: Auto-generated weekly HR attrition reports.

AI-Based Product Recommendation System

Description: Build a recommender and use Gen AI to generate personalized recommendation explanations.

Tools and Technologies: Python, Surprise/LightFM, Gen AI.

Outcomes: Smart recommendation engine with human-like reasoning.

Automated EDA (Exploratory Data Analysis) Agent

Description: Create an agent that performs EDA and generates charts + a written summary.

Tools and Technologies: Python, Pandas-Profiling, LangChain, LLMs.

Outcomes: Train a fraud model and use Gen AI to interpret risky transactions in plain language.

Social Media Sentiment Insights with AI

Description: Analyze brand sentiment and let Gen AI produce a sentiment intelligence report.

Tools and Technologies: Python, NLP, HuggingFace Models, OpenAI API.

Outcomes: AI-written brand reputation analysis.

AI Query Assistant for Business Data

Description: Build a chatbot that answers questions from company data using natural language.

Tools and Technologies: Vector DB, RAG + Agentic AI.

Outcomes: Interactive data assistant for real-time business insights.
